

3200-Series Digital Telephones

The Strata CIX670, CIX200, CIX100 and CTX28 business communication systems support the Toshiba 3200-series digital telephones, which offer a number of useful features that are easy to access. Available in charcoal gray color.

Digital Speakerphones

Are you using the handset or the speakerphone? Thanks to state-of-the-art Toshiba technology, your callers will have a hard time telling. You'll appreciate ergonomic design for exceptional comfort, easy-to-read feature buttons, and programmable buttons that condense operational sequences into single-button ease.

For busy call environments, choose the Toshiba 20-button digital speakerphone for the ability to access numerous features with push-button simplicity and add additional easy-access features with the optional 20-button Add-On Module or 60-button DSS Console.

Digital Display Speakerphones

Toshiba Digital Display Speakerphones make using your business communication solutions simple. Large easy-read LCD screens display feature-prompting information, helping you manage your telephone easier. One-touch programmable buttons save time and give you faster access to advanced calling functions. It's all designed to enable employees to work smarter, minimize training time, and take productivity to new levels.

Select from the 20-button or 10-button 2-line display model, or the 14-button 8-line display model.
