Talk smart. Go wireless.

GN Netcom

Change the way your office talks

Talk smart. Go wireless.

Working freedom The hectic tempo of modern office life places extreme demands on you. You're expected to do increasingly more, do it quicker and communicate it clearly and accurately.

GN Netcom has developed the GN 9300 series to help you meet these demands with ease. Designed to change the way you communicate, the GN 9300 series untethers you from your desk, allowing for greater comfort and increased

productivity. Free yourself from the restrictions of your telephone handset and improve your working efficiency.

Step into a different office environment: a wireless one. Your desk will no longer impede you. Move hands-free and unhindered throughout the day. Improve the way you work:

Talk smart. Go wireless.

Change the way you talk The new GN 9300 series of wireless office headsets marks the latest in a long line of innovations GN Netcom has introduced over the years, and they will change your office forever.

Leading this revolution is the high-performance GN 9350, the ultimate example of wireless headset functionality. This headset has several industry firsts: the first to offer full convergence between traditional and IP telephony, the first to provide DSP enhanced sound clarity and the first to offer IP telephony with wideband audio. For use with both

traditional desk telephones and PC-based internet calling, the dual connection GN 9350 always meets your needs.

Feel the benefits of hands-free productivity and a feather-weight, ergonomic design. Each of the 3 new GN 9300 series headsets is a groundbreaking, stylish product designed to push all the boundaries. Whatever your needs, there's a GN 9300 that's made to suit you. Office conversation has just changed forever.

The GN 9300 Series: Headsets have never sounded so good

GN 9350

Superior sound. Dual connectivity.

- Up to 300 feet of office mobility
- Future-proof investment: single headset for traditional and PC phone calls
- WiFi-friendly 1.9 GHz frequency with DECT 6.0 wireless technology
- DSP and IntelliTone™ for superb sound quality and greater hearing protection
- Noise-canceling microphone for reduced background noise
- Digital encryption for secure conversations
- LCD display for easy set-up of personal sound preferences
- Lightweight design and three wearing styles: headband, earhook and neckband
- Multi-unit conferencing capability

Talk smart. Go wireless.

Superior sound The GN 9300 series headsets provide you with crystal-clear, natural sound. A noise-canceling microphone guarantees clear voice transmission, even in noisy environments. The GN 9350 uses Digital Signal Processing to purify the incoming signal, enriching sound quality, and IntelliTone™ ensures there's always a safe, consistent volume level.

Increase your range Freedom to move around your working environment is essential; increased mobility reduces stress and improves productivity. The GN 9350 allows you to interact with your colleagues within a range of up to 300 feet – and the GN 9330 and GN 9330 USB up to 200 feet – enabling you to exchange and refine ideas throughout your entire office.

GN 9330 USB
Wireless IP telephony. Wideband sound.

- Up to 200 feet of wireless freedom
- WiFi-friendly 1.9 GHz frequency with DECT 6.0 wireless technology
- Revolutionary wideband sound quality for IP telephony

Work in comfort The more comfortable you are, the more productive you are. The GN 9300 series eliminates the neck and muscle pain caused by cradling a traditional telephone handset between your neck and shoulders. Your optimum physical comfort is assured through a choice of wearing styles to match your preference, and a lightweight, ergonomic construction allows you to feel at ease throughout your work day.

Time to talk All GN 9300 series headsets offer more than enough talk time to conduct a full day's business. If your environment demands more, an optional, interchangeable battery is available for around-the-clock talk time. So whichever model suits you best, you can talk and move freely, without the worry of being cut short.

Headset in stand The small size and sleek stylish look of all the bases in the GN 9300 series ensure they'll fit perfectly on the surface of any desk. Headsets dock in the base to charge batteries, and with the GN 9350, to join conference calls.

Boom-arm The GN 9300 series' noise-canceling microphone ensures your voice is always transmitted clearly, even in noisy environments.

Talk button Answer calls by pressing an easily accessible talk button; the link indicator will then light. The GN 9350's talk button is also used to join conference calls – secondary headsets just have to dock and press.

Personal customization settings The GN 9350 base's LCD display allows you to tailor an extensive range of controls to your own specific needs:

- Transmit volume setting
- Remote handset lifter selection
- Range/power selection
- Treble/bass selection
- Automatic control of incoming audio (IntelliTone™)

Maximize communications convenience The optional GN 1000 Remote Handset Lifter is the perfect accessory for your GN 9300 series headset*. Using the lifter enables you to answer and end calls while away from your desk.

*Not applicable for GN 9330 USB

Talk smart. Go wireless.

Wearing styles Try all of the interchangeable wearing styles*, find the one that suits you best and enjoy a lightweight, comfortable fit.

*GN 9350: Earhook, neckband, headband.
GN 9330 and GNN 9300 USB: Earhook and headband.

Easy set up The GN 9330 base could not be simpler to setup. An easy-to-operate slide control facilitates dial tone adjustment. After securing a clear, audible dial tone the microphone volume wheel can be used to set the transmit volume of your voice, ensuring that the conversation will be heard properly at both ends of the line.

Rocker switch and speaker The rocker volume control is both intuitive and easy to use. Use it to adjust headset speaker volume during a call or to mute the outgoing signal.

PC-based IP Telephony The GN 9350 is unique in its capacity to offer both desk phone and PC-based IP telephony functionality. This dual capability means you have the ability to move with technology and enjoy the benefits of both. The GN 9330 USB and

the GN 9350's USB plugs facilitate easy connection to your computer; your headset can then be easily used for all of your calls coming across the computer.
